

HW answers:

20) Undercoverage- Not all residents go to the park

Not all residents are parents

Nonresponse- some parents may not fill out or give back the questionnaires

Response Bias- location of the survey is at the park- could influence responses

Voluntary Response Sample

23) (a) YES! There is response bias due to the wording of the questions. Question 1 favors not testing, and Question 2 favors testing

(b) **Question:** It has been proposed that elementary school students pass a test at the end of each school year in order to move onto the next grade. Do you agree or disagree with this policy?

25) Yes, biased toward favoring environmental cleanup by companies.

Better: Should companies be responsible for any costs of environmental cleanup?

Yes, bias toward no, it is not fair to set the drinking age at 21.

Better: Do you think the drinking age should be lowered from 21?
OR What do you think the drinking age should be?
